Hà Nội, Việt Nam

EDUCATION

National Economics University (NEU)

Bachelor of Data Science

2024– Present

- Second-year student
- Relevant coursework: Probability & Statistics, Econometrics, Data Analysis

LANGUAGE

- English (7.0 IELTS certification)

SUMMARY

Second-year Data Science student at NEU with experience in machine learning and data analysis. Fast learner with a strong willingness to learn, adapt, and support team members. Seeking a Data Analyst/Data Science Intern role to gain hands-on experience and contribute to real-world solutions.

VŨ TRẦN CÁT LINH

Data Scientist/ Data Analyst

PROJECTS

Automatic License Plate Recognition (Machine Learning Project)

Link github: <https://github.com/linhsand/automatic-number-plate-recognition/tree/main>

- Developed a basic license plate detection system using computer vision techniques
- Processed image and video data for object detection tasks
- Applied machine learning concepts to real-world traffic scenarios

German Credit Risk Analysis (Machine Learning Project)

Link github: <https://github.com/linhsand/german-credit-risk>

- Built a predictive model using the German Credit dataset
- Performed data preprocessing (missing values, feature scaling)
- Evaluated model performance using RMSE and R^2

Hello Kitty Calories Tracking Project

Link github: https://github.com/duynguyen260406-source/CalorieBurn_ML_Model

- Designed a calorie estimation system using structured food data
- Performed data cleaning and unit standardization
- Applied data analysis to support dietary decision-making

EY Data & AI Challenge (Competition)

Link github: <https://github.com/Tramle26/EY-AI-challenge>

- Participated in a data/AI competition focusing on video detection models
- Conducted model benchmarking and performance analysis
- Collaborated in a team environment to solve real-world problems

SKILLS

1. Data Analysis

- Python (pandas, numpy, scikit-learn), statistical analysis; Regression (OLS, interpretation, F-test, p-value)

2. Machine Learning

- Supervised learning (basic); Model evaluation (RMSE, R^2); Feature scaling, missing data handling

3. Programming

- Python (pandas, sklearn – nếu có); SQL (MySQL); R (statistical analysis)

4. Computer Vision

- Image processing; Object detection fundamentals
